EXP – 6

HTML code :

```html
<!DOCTYPE html>
<html>
<head>
<title>GET vs POST Demo</title>
</head>

<body>

<h2>HTTP GET and POST Method Demonstration</h2>

<form action="MethodServlet" method="get">
Name: <input type="text" name="username">
<input type="submit" value="Send using GET">
</form>

<br>

<form action="MethodServlet" method="post">
Name: <input type="text" name="username">
<input type="submit" value="Send using POST">
</form>

</body>
</html>
```

JAVA code :

```java
import javax.servlet.*;
import javax.servlet.http.*;

public class MethodServlet extends HttpServlet {

    protected void doGet(HttpServletRequest request, HttpServletResponse response)
    throws ServletException, IOException {

        response.setContentType("text/html");
        PrintWriter out = response.getWriter();

        String name = request.getParameter("username");

        out.println("<html><body>");
        out.println("<h2>Request received using GET method</h2>");
        out.println("Name: " + name);
        out.println("</body></html>");
    }

    protected void doPost(HttpServletRequest request, HttpServletResponse response)
    throws ServletException, IOException {

        response.setContentType("text/html");
        PrintWriter out = response.getWriter();

        String name = request.getParameter("username");

        out.println("<html><body>");
        out.println("<h2>Request received using POST method</h2>");
        out.println("Name: " + name);
        out.println("</body></html>");
    }
}
```
